---

**SUBJECT: Construction of Barge Loading/Unloading Facility, Tennessee River Mile 457.0, Right Bank**

Simpson Construction will begin construction of a barge loading/unloading facility at the subject location around 1 May 2006. Work will be performed during daylight hours. While current construction plan provides for all mooring cells, dolphins and other structures to be built by shore-base equipment, small sectional barges will be used to provide work-space and site access for workers. These sectional barges will be moored on-site along the right descending bank. Construction is expected to be completed in late August or early September .

Vessel operators are requested to hold a safe distance off this site when transiting this area to reduce the possibility of their vessel wake causing equipment damage or personal injury.

FOR THE DISTRICT ENGINEER:

-original signed-

JEFFREY D. ROSS  
Chief, Navigation Branch  
Operations Division
